Projects

- **Flower Shop Web Application**
  - Created with ASP.NET web framework and C#, while applying Domain Driven Design design philosophy.
  - Features account login/register, order system, manage flower system, and manage account system, complete with data validation and error handling.
- **Simple Game Static Web**
  - Created using HTML, CSS and JavaScript.
  - Features web pages describing the simple game and its contents through image slider and CSS styling.
- **Code/Smell Reengineering Project**
  - Gathered 23 different code smell examples and provided refactored results for each of the examples.
- **Scrum Roleplay Project**
  - Participate in a 4-month software development project as a Scrum Master. Facilitating a scrum team and documenting the meetings and processes in the project.
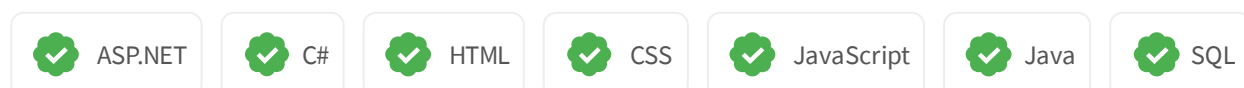

Education

Bina Nusantara University
Computer Science
